**Subject:** REACH registration of ammonium phosphates: EINECS 269-789-9 and 245-159-9 (IP65, 67)

**Object: REACH registration of ammonium phosphates: EINECS 269-789-9 and 245-159-9 (IP65, 67)**

This is to inform you that the IP Consortium intends to REACH register the following substances:

- IP65: "Polyphosphoric Acid Ammonium Salts Non Polymer Grade", EINECS 269-789-9, as a Multi-constituent Substance, in 2015 (> 1000 tonnes), with Lead Registrant Prayon
- IP67: "Diphosphoric acid, ammonium salt" (synonym: Monoammonium pyrophosphate), EINECS 245-159-9, as a Mono-constituent Substance, in 2015 (> 1000 tonnes), with Lead Registrant Yara

The IP Consortium members continue to consider Polyphosphoric Acid Ammonium Salts with >70% chain length >2 to be a polymer (IP20 Ammonium polyphosphate, polymer grade, also EINECS 269-789-9). Therefore, as already communicated, the IP Consortium Members will not be preparing a REACH registration dossier for this polymer grade, will not contribute to any costs or work spent on preparing such a dossier, and will not be registering this polymer grade substance under REACH.

If you are concerned by one of the two above substances, or by similar substances for which there may be possibilities of sameness or read-across, **we request that you verify the following information, and send any comments to the IP Consortium**

**[ip@reachcentrum.eu](mailto:ip@reachcentrum.eu) by 15<sup>th</sup> March 2015** latest:

- Proposed substance sameness specifications (SIP)
- Proposed tables of covered uses and applications, including SU, PC, PROC, ERC, AC categories as appropriate.

These documents are available for comment on the IP Consortium website

<http://www.reachcentrum.eu/consortium/ip-reach-consortium-126.html>

Please also consult the SIEF Agreement Contract text. Electronic signature of this contract will be necessary for Letter of Access purchase. The text of this contract is available for consultation on the IP Consortium website <http://www.reachcentrum.eu/consortium/ip-reach-consortium-126.html>

No response to this email by the date indicated above will be taken as agreement to all the above elements as communicated. In particular, please note that any uses and applications communicated after that date may not be covered in the Registration dossier.

On behalf of the IP Consortium (Inorganic Phosphates) Members:  
Marc Aerssens, Consortium Secretariat,
