

September 2018

EMAIL to the Aluminum orthophosphate_232-056-9_SIEF (IP40):

Subject: Aluminum orthophosphate, EC No. 232-056-9, CAS No. 7784-30-7 / 22784-12-9 and use in Water treatment, Inorganic Phosphates Consortium

To all members of the **Aluminum orthophosphate_232-056-9_SIEF**,

Following a review of ECHA CoRAP for aluminum sulphate and aluminum chloride it is noted that specific EN standards exist to define the composition (including any impurities) of these aluminum substances when used in water treatment. ECHA requires the registrants of Al-sulphate and Al-chloride to provide data that shows that their substances when used in water treatment products meet the required compositional standards.

It was noted that registrants have stated that aluminum orthophosphate is also used in water treatment operations. Therefore, we request information from companies using the substance in this way to confirm whether or not an EN standard exists.

If companies do not wish to use the substance in water treatment please inform the consortium and we will remove this use from the dossier / CSR.

Please let us have your **feedback no later than September 21, 2018** to

secretary@inorganic-phosphates.org

In case you have questions, please do not hesitate to contact us.

With kind regards,

Consortia Management GmbH

Secretariat of the Inorganic Phosphates REACH Consortium
