Subject: Dossier updates IP2, IP3, IP4, IP47, Inorganic Phosphates (IP) Consortium

To all co-registrants of above-mentioned substances,

This communication is to inform you that the lead registrants, Prayon S.A., Rue J. Wauters 144, 4480 Engis, Belgium (IP2, IP3, IP4), and BK Giulini GmbH, Giulinistrasse 2, 67065 Ludwigshafen, Germany (IP47), updated their dossiers and CSRs.

The dossiers have been updated to include a new study (dissociation constant, 2019). This follows the testing proposal that was included in January 2018 and that was confirmed by ECHA's decision in August 2018.

As **IP2 and IP3 are not classified**, the CSRs have been submitted jointly by the lead registrant and therefore co-registrants do not need to update their dossiers. In addition, for **IP4 (classified)** the lead registrant has also submitted the CSR jointly for all co-registrants. **IP47 is classified**, too, and every co-registrant has to submit its own CSR. Co-registrants are therefore required to update their dossiers as well. The required actions of co-registrants are summarized on page 2 of this communication.

Please note that we also plan to update the IP2, IP3 and IP4 dossiers related to the uses later this year.

In case of questions, please contact us at secretary@inorganic-phosphates.org

With kind regards,

Consortia Management GmbH
Secretariat of the IP Consortium
